Sunman, Indiana 47041-8227

Dear Dave:

Griffin Pipe Products Co., Inc. is proud to present this plaque to Lykins Contracting Inc. in recognition of the successful completion of the "Dudley Discharge 36" Redundancy Project" in the Northern Kentucky Water District.

Comprising over 1,000' of 36" diameter Restrained Joint Ductile Iron Pipe and 5,100' of 36" Fastite Joint Ductile Iron Pipe - Lykins Contracting deserves to be commended for the success of the "Dudley Discharge 36" Redundancy Project". There is a considerable difference between installing 6"-24" ductile iron pipe and 36" ductile iron pipe; many contractors who attempt this transition to large diameter installation experience a considerable learning curve with problems after their job completion. The professionalism displayed by all employees of Lykins Contracting Inc. made this project an example of how large projects should be completed.

Griffin Pipe appreciates the opportunity to have collaborated with Lykins Contracting Inc. and HD Supply Waterworks bidding, laying out and helping to completion on a project of such great significance.

Thank you for the opportunity to work together on this project and we look forward to working with you in the future.

Sincerely,

Troy Temple
